Vinyl Sheet Flooring

DECORIA Leum

High-quality premium flooring with affordability and stability

With over 40 years of know-how from Daejin DECORIA, we applied a high-strength transparent upper layer developed by ourselves to secure stable dimensional stability through the deformation prevention layer. In addition, it can be used anywhere at an economical price.

Safe flooring for healthy family living (3.2T / 5.0T applicable)

DECORIA 3.2T and 5.0T maintain a pleasant living environment and health by applying non-phthalate plasticizer and organic/inorganic hybrid antimicrobial agents in line with Daejin Korea's corporate ideology for considering the health and safety of its users.

Non-phthalate plasticizer application

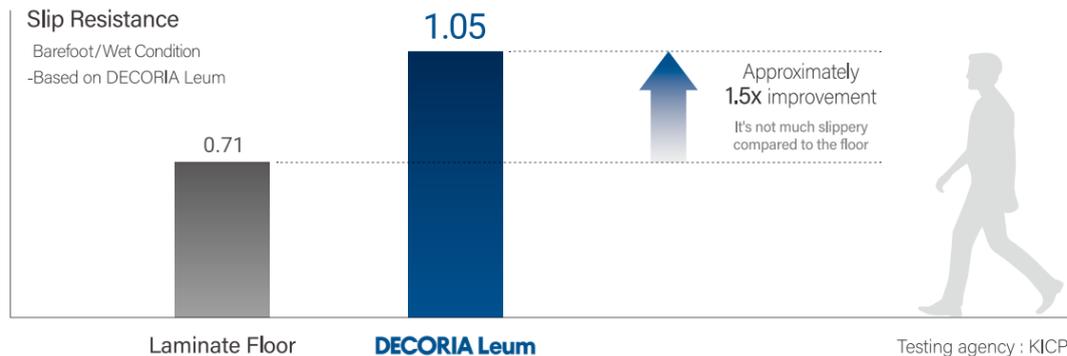

It is a safe product that helps keep the living space healthy by reducing environmental pollution such as pollutants and green house gases, not phthalate plasticizers that may have harmful effects on health.

Reducing living noise and Comfortable walking (3.2T / 5.0T applicable)

DECORIA SUUN 5.0 Stable Calm applied a high-elastic shock-absorbing layer made by Daejin's own special method to reduce the impact transmitted during life so that you can feel comfortable walking and reduces lightweight shock sounds generated in daily life through shock absorption and noise reduction made by special construction, thereby reducing inter-floor noise and reducing living noise for a more comfortable life.

Application of non-slip surface treatment considering family's safety

Daejin's unique special production anti-slip surface treatment allows safe walking in real life.

Design for oversea width 2m

Reducing living noise and Comfortable walking

DECORIA SUUN 5.0 Stable Calm applied high elastic shock absorption and reduction layers manufactured by Daejin's special method to reduce the impact transmitted during life, reducing comfortable walking, floor noise, and living noise to enable a more comfortable life.

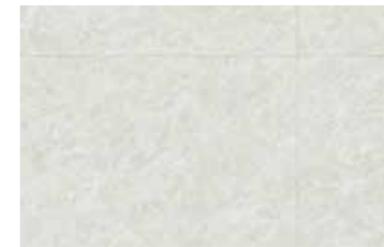

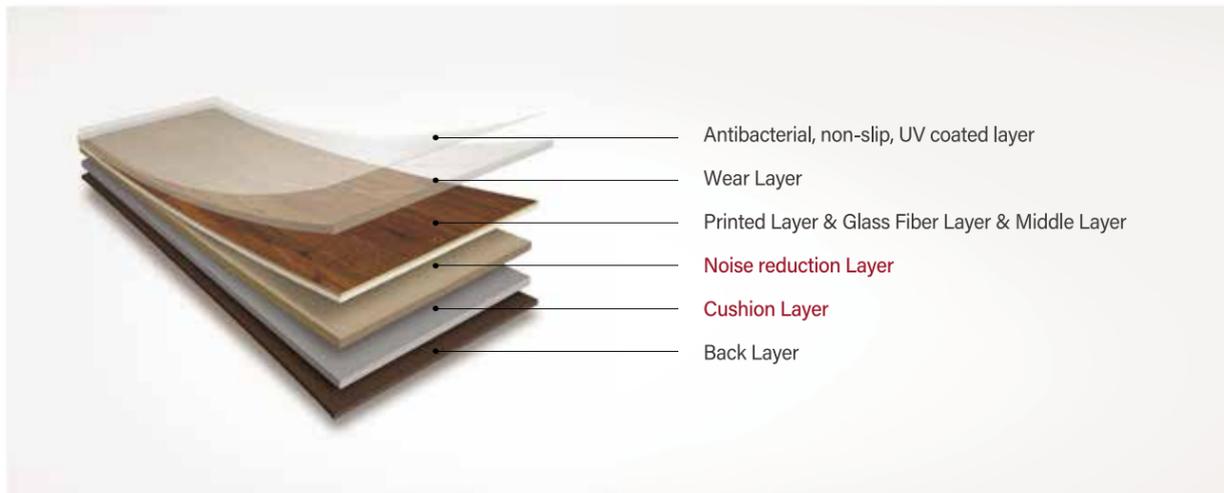

More realistic and various desgin

Based on the experience of developing PVC flooring materials over the past 40 years, we developed designs that fit the latest trends to make the **feel of high-end wood** and **marble** more realistic, developed and applied more diverse colors to match them, and applied more natural designs to create a new space.
